

# CLI commands

## Datenbankenüberprüfung nach Updates / Recovery

```
diagnose sql status migrate-db -> Show log SQL database migrate status  
diagnose sql status rebuild-db-> Show log SQL database rebuild status  
diagnose sql status upgrade-db -> Show log SQL database upgrade status
```

## Datenbank neu aufbauen

### FortiAnalyzer muss neu gestartet werden!

```
execute sql-local rebuild-db -> Datenbank neu aufbauen
```

## FortiAnalyzer Ports freigeben um diese an den FortiManager anzubinden

```
config system interface  
edit "port1"  
set allowaccess fgfm https ssh snmp ping  
next  
end
```
